## Praise for *The Challenge Of Creation*

“Seekers... will find in this work a model of honest confrontation with serious challenges. *The Challenge of Creation* spells out these challenges articulately, analyzes them keenly, and refers to impeccable and authoritative traditional sources to address them... Rabbi Slifkin is to be commended for his contribution to our abiding faith as well as for his courageous intellectual honesty.”

Rabbi Dr. Tzvi Hersh Weinreb  
Executive Vice President, The Orthodox Union

“In this revised edition of *The Science of Torah*, Rabbi Slifkin addresses creation and evolution with courage and integrity... Rabbi Slifkin sets down a highly sophisticated and deeply religious account of how an informed contemporary Jew is to think about the biblical story of creation. Clear, cogent, and philosophically convincing, Rabbi Slifkin’s *The Challenge of Creation* is an intellectual *kiddush Hashem*.”

Professor Yehuda Gellman  
Dept. of Philosophy, Ben-Gurion University

“*The Challenge of Creation* is a wonderful and important book... Rabbi Slifkin writes with clarity and logic and with a firm grasp of the scientific issues... It is an invaluable resource for those of us in communities where the scientific ideas described in this book are known to be firmly established and where students, friends and colleagues constantly question us about traditional Judaism’s views on modern science.”

Professor Carl Rosenzweig  
Dept. of Physics and Astronomy, Syracuse University
